

BILOG ANTENNA

BLA30M1G

Bilog Antenna, is a hybrid antenna consist of Logarithmic Periodic Antenna and broadband balun. It is used to measure radiated emission in 30 MHz to 1 GHz frequency range according to various standard with one antenna. Wooden or composit antenna mast can be supplied as an option. Its usable frequency is extendable up to 3 GHz.

Technical Specification

Frequency Range	30 MHz – 1 GHz
Antenna Factor	Individually calibrated
Connector Type	N
